18	Deionised-water final rinse where appropriate
19	Controlled drying and finishing
20	Final quality inspection

SERVICE NOTES

- For scooters with enclosed CVT transmissions, chain cleaning and lubrication do not apply.
- Water-mark treatment covers treatable surface deposits; etched marks requiring polishing are quoted separately.
- Avoid directing high-pressure water at electrical connectors, instrument clusters, bearings or sensitive controls.
- Trim dressing must not be applied to tyre treads, brake discs, pads or control grips.
- Unusually large, heavily soiled or complex motorcycles may require a custom quote.
