TED

# THE EDUCATED DETAILER

## FOUR LEVELS OF DETAILING

A progressive service framework for four-wheelers

FRESHMAN • SCHOLAR • GRADUATE • DOCTORATE

PREMIUM AUTOMOTIVE CARE

THE TED DETAILING SYSTEM

# Four levels. One standard of care.

TED uses an education-inspired package structure to make the customer journey easy to understand. Each level builds on the previous one: from routine maintenance cleaning to comprehensive, detail-oriented vehicle care. The package descriptions below are a proposed service framework for staff SOPs and customer communication.

| LEVEL | POSITIONING | SERVICE SCOPE |
|---|---|---|
| **01 · FRESHMAN** | The Fundamentals | Routine exterior wash and basic interior cleaning. |
| **02 · SCHOLAR** | Enhanced Care | Freshman plus additional cleaning and tyre/trim dressing. |
| **03 · GRADUATE** | Deep Cleaning | Scholar plus suitable steam cleaning and odour-control procedures. |
| **04 · DOCTORATE** | Comprehensive Detailing | Graduate plus meticulous accessible-area and specialised-surface care. |

PACKAGE 01

# FRESHMAN — The Fundamentals

### Routine maintenance wash • pH-neutral shampoo • Deionized-water final rinse

The entry-level package focuses on routine cleaning without intensive detailing or additional dressing services.

| | |
|---|---|
| 1. Initial vehicle inspection | 6. Exterior glass cleaning |
| 2. Wheel and tyre surface cleaning | 7. Deionized-water final rinse |
| 3. Exterior pre-rinse | 8. Interior dust removal using clean microfiber |
| 4. pH-neutral shampoo wash | 9. Interior vacuuming |
| 5. Exterior panel cleaning | 10. Floor mat cleaning and placement |

**Package standard:** A clean exterior and tidy interior for routine maintenance.

PACKAGE 02

# SCHOLAR — Enhanced Care

### Everything in Freshman, plus additional surface care and dressing

A more refined cleaning experience, with additional interior attention and dressing for tyres and suitable exterior trims.

| | |
|---|---|
| 11. Detailed wheel-face cleaning | 16. Dashboard microfiber cleaning |
| 12. Accessible wheel-arch cleaning | 17. Centre-console surface cleaning |
| 13. Tyre dressing application | 18. Interior door-panel cleaning |
| 14. Exterior plastic-trim dressing | 19. Interior glass cleaning |
| 15. Door-jamb cleaning | 20. Interior dusting of accessible crevices |

**Package standard:** A more refined appearance with additional attention to interior touchpoints, tyres, and exterior trims.

**Note:** Tyre and trim dressings are appearance treatments, not paint-protection services.

PACKAGE 03

# GRADUATE — Deep Cleaning

### Everything in Scholar, plus targeted deep-cleaning procedures

For vehicles requiring more attention than a regular maintenance wash. Steam and odour-control procedures are selected according to the surfaces and the vehicle's condition.

| | |
|---|---|
| 21. Touchless pre-rinse using a suitable pre-wash chemical | 30. Cleaning of accessible seat rails |
| 22. Steam cleaning of suitable interior surfaces | 31. Steering-wheel and control-area detailing |
| 23. Deep cleaning of floor mats | 32. Targeted cleaning of interior plastic surfaces |
| 24. Fabric-seat cleaning where appropriate | 33. Interior odour-source inspection |
| 25. Carpet and floor-area deep cleaning | 34. Appropriate odour-neutralisation treatment |
| 26. Targeted stain treatment | 35. Ozone treatment, when suitable and requested |
| 27. Detailed cleaning of accessible seat crevices | 36. Final interior vacuuming |
| 28. Deep cleaning of interior door pockets | 37. Final interior quality inspection |
| 29. Detailed cleaning around cup holders | |

**Package standard:** A deeper cleaning experience for vehicles requiring more attention than routine maintenance.

PACKAGE 04

# DOCTORATE — Comprehensive Detailing

## Everything in Graduate, plus meticulous detailing of accessible and intricate areas

TED's highest level of cleaning. The aim is comprehensive care, with close attention to hard-to-reach areas, interior components, specialised surfaces, and compatible reusable performance air filters.

### Proposed service operations

| |
|---|
| 38. Detailed inspection of interior and exterior condition |
| 39. Careful cleaning of accessible exterior panel gaps |
| 40. Detailed cleaning around exterior badges |
| 41. Cleaning of accessible grille sections |
| 42. Detailed cleaning around door handles |
| 43. Detailed cleaning of exterior mirrors |
| 44. Cleaning of accessible fuel-filler area |
| 45. Detailed cleaning of door jambs and hinges |
| 46. Detailed cleaning of weather-seal surfaces |
| 47. Detailed cleaning around window switches |
| 48. Cleaning of steering-wheel buttons |
| 49. Detailed air-vent cleaning |
| 50. Cleaning around dashboard seams |
| 51. Detailed centre-console crevice cleaning |
| 52. Cleaning around seat-belt buckles |
| 53. Detailed seat-stitching cleaning where suitable |
| 54. Headliner spot cleaning where appropriate |
| 55. Leather cleaning, where applicable |
| 56. Suitable leather conditioning |
| 57. Detailed fabric-upholstery treatment where applicable |
| 58. Carpet extraction where suitable and equipped |
| 59. Boot or luggage-compartment vacuuming |
| 60. Boot-area surface cleaning |
| 61. Spare-wheel-well cleaning where accessible |
| 62. Detailed cleaning of removable floor mats |
| 63. Cleaning of seat adjustment controls |
| 64. Cleaning of accessible seat tracks |

| |
|---|
| 65. Cleaning of child-seat contact areas when unoccupied and accessible |
| 66. Cleaning around interior storage compartments |
| 67. Cleaning of accessible charging ports externally |
| 68. Cleaning around infotainment controls |
| 69. Appropriate cleaning of piano-black trim |
| 70. Appropriate care of delicate interior finishes |
| 71. Detailed cleaning of window edges |
| 72. Cleaning of accessible rubber seals |
| 73. Cleaning of exterior plastic details |
| 74. Detailed wheel-spoke cleaning |
| 75. Cleaning of accessible wheel-barrel areas |
| 76. Detailed tyre-sidewall cleaning |
| 77. Cleaning of accessible wheel-arch surfaces |
| 78. Removal of suitable bonded contamination from exterior surfaces |
| 79. Targeted iron decontamination, where needed and compatible |
| 80. Detailed cleaning around emblems and badges |
| 81. Final deionized-water rinse |
| 82. Detailed drying of exterior crevices |
| 83. Drying of accessible door-jamb areas |
| 84. Cleaning of exterior glass edges |
| 85. Final inspection of exterior finish |
| 86. Final inspection of interior surfaces |
| 87. Cleaning of accessible dashboard vent fins |
| 88. Cleaning around the gear selector |
| 89. Detailed cleaning of accessible handbrake controls |
| 90. Cleaning around seat-belt anchor areas |
| 91. Final odour-control assessment |
| 92. Performance air-filter inspection, if applicable |
| 93. Cleaning of a compatible, reusable performance air filter, if required |
| 94. Reinstallation of the filter according to manufacturer instructions |
| 95. Verification that the filter housing is properly closed |
| 96. Final interior glass inspection |

| |
|---|
| 97. Final tyre-dressing inspection |
| 98. Final exterior-trim inspection |
| 99. Final wheel and tyre inspection |
| 100. Final inspection of accessible exterior crevices |
| 101. Final inspection of high-touch interior areas |
| 102. Confirmation that serviced surfaces are dry where required |
| 103. Removal of detailing residue from treated surfaces |
| 104. Final vehicle presentation |
| 105. Completion of a detailing quality-control checklist |

**Package standard:** A comprehensive, detail-oriented service. Not every operation is necessary or appropriate for every vehicle; inclusions depend on condition, equipment, materials, and safe access.

VEHICLE CATEGORIES

# One system, tailored by vehicle type

The four package names remain consistent across vehicle categories. Pricing, product quantity, labour time, and service feasibility should be adjusted for vehicle size, complexity, and materials.

| CATEGORY | EXAMPLES |
|---|---|
| Hatchback | Hyundai i20, Maruti Baleno |
| Sedan | Honda City, Hyundai Verna |
| Compact SUV | Hyundai Creta, Kia Seltos |
| SUV | Toyota Fortuner, Mahindra XUV700 |
| Luxury vehicle | Mercedes-Benz E-Class, BMW 5 Series |
| Lifestyle truck | Toyota Hilux, Isuzu D-Max |

STANDARD OPERATING RULES

# Consistency, safety and clear expectations

| | |
|---|---|
| **Freshman** | pH-neutral shampoo wash by default, with routine interior and exterior cleaning. |
| **Scholar** | Adds tyre and trim dressing plus more detailed cleaning of interior and exterior surfaces. |
| **Graduate and Doctorate** | Use a suitable touchless pre-rinse product followed by pH-neutral shampoo where compatible, alongside relevant deep-cleaning procedures. |
| **Water quality** | Use TED's deionized-water process for the final rinse to help minimise mineral deposits and water spotting. |
| **Paint correction** | Quoted separately after inspection. It is not automatically included in Doctorate. |
| **Performance air filters** | Clean only compatible, reusable filters according to the manufacturer's procedure. Ordinary disposable paper filters should not be washed. |
| **Conditional operations** | Leather care, fabric extraction, ozone treatment, iron decontamination, and other specialised procedures are performed only when appropriate. |

IMPORTANT SERVICE NOTES

Steam cleaning must be selected according to the surface and manufacturer guidance. Ozone treatment should be performed only in an unoccupied vehicle, followed by the required ventilation; it should not be presented as a guaranteed cure for every odour. Air-filter cleaning must follow the filter manufacturer's instructions. The operation list is a proposed staff framework, not a promise that every operation will be performed on every vehicle.
